

Open Text NFS Client™ 14

The most complete NFS and host access solution *for enterprise connectivity needs*

Open Text NFS Client™ allows users from all types of Microsoft® Windows® operating systems to transparently, securely, and efficiently access file and printer resources residing on UNIX®, Linux®, VMS, Macintosh, and many NFS-enabled hosts. Open Text NFS Client supports all of the latest developments in the industry-standard NFS protocol, which includes NFSv2, v3, and v4, WebNFS, GSSAPI-Kerberos implementation, and LIPKEY security infrastructure. To increase the value to our users, Open Text NFS Client also comes bundled with the terminal emulation suite—Open Text® HostExplorer®.

System requirements

- **Hard drive space for typical installation:** 69 MB
- **Minimum CPU requirements:** Pentium 4
- **Operating systems:** Windows 7, Windows Vista, Windows XP SP2, Windows Server 2008, Windows Server 2003, Windows Terminal Server Edition, Citrix® XenApp™ for Windows platforms

Technical specifications

Certification	<ul style="list-style-type: none"> • FIPS 140-2 Validated 	
NFS support	<ul style="list-style-type: none"> • Supports NFS version 2, 3, and 4 (RFC1094, RFC1813, RFC3530) • Both client and server implementations • Kernel mode implementation • Native 64-bit support for Microsoft Windows x64 family and Windows 7 	<ul style="list-style-type: none"> • Supports operation in IPv6 networks • Supports Setuid and Setgid • Supports WebNFS (RFC2054) and NFS over TCP • Supports Microsoft® UNC • Deviceless connection support
Terminal Emulation	<ul style="list-style-type: none"> • 3270, 5250 and VT emulation • Printing and file transfer support • Support for multiple code pages (Euro ready) • Integrated Web-to-host capability 	<ul style="list-style-type: none"> • Integrated with HostExplorer FTP • Macro engine—recording, edition and playback • Support for automation with extensive APIs: COM, EHLLAPI, WinHLLAPI, OHIO, etc.
Directory services support	<ul style="list-style-type: none"> • Support multiple directory service profiles for each directory service type • Support per-connection selection of directory service profile • Supports NIS, NIS+, LDAP, and Microsoft Active Directory® 	<ul style="list-style-type: none"> • Supports schema definitions including: RFC2307, RFC2307AIX, AD4UNIX, and Vintela VAS • NFS server browsing • Auto-mount capability
Security	<ul style="list-style-type: none"> • Supports RPCSEC-GSS (RFC2203) and GSS-API (RFC2078) • Supports Kerberos and LIPKEY as GSS providers 	<ul style="list-style-type: none"> • Supports Solaris® ACL and SASL protocol for authenticating with Microsoft Active Directory domain (RFC2222)
Name mapping server	<ul style="list-style-type: none"> • A stand-alone server to map Windows user and group to UNIX® UID and GID • Intelligent Name Mapping Cache for improved productivity 	<ul style="list-style-type: none"> • Supports Auto Mapping and Import/Export of mappings • Integrates with Directory Services
