

# Open Text NFS Solo™ 14

The *de facto* standard for Network File System protocol on PCs

The advanced Network File System (NFS) features strong security, seamless integration with the Microsoft® Windows® operating systems, and comprehensive support for enterprise directory services make Open Text NFS Solo™ the most advanced and secured PC NFS client. It also provides bi-directional file and printer access between Windows and NFS-enabled hosts. Open Text NFS Solo supports all the latest NFS technologies, including NFSv4, NFS over TCP, and WebNFS.

## System requirements

- **Hard drive space for typical installation:** 15 MB
- **Minimum CPU requirements:** Pentium 4
- **Operating systems:** Compatible with Windows 7, Windows Vista, Windows XP SP2, Windows Server 2008, Windows Server 2003, Windows Terminal Server Edition, Citrix® XenApp™ for Windows platforms

## Technical specifications

<b>Certification</b>	<ul style="list-style-type: none"> <li>• Compatible with Windows 7</li> </ul>	
<b>NFS support</b>	<ul style="list-style-type: none"> <li>• Supports NFS version 2, 3, and 4 (RFC1094, RFC1813, RFC3530)</li> <li>• Both client and server implementations</li> <li>• Kernel mode implementation</li> <li>• Native 64-bit support for Microsoft Windows x64 family and Windows Vista</li> <li>• Supports operation in IPv6 networks</li> <li>• Supports Setuid and Setgid</li> <li>• Supports WebNFS (RFC2054) and NFS over TCP</li> </ul>	<ul style="list-style-type: none"> <li>• Supports 32-bit file locking</li> <li>• Hard and soft mount</li> <li>• Supports Microsoft® UNC</li> <li>• Deviceless connection support</li> <li>• Wizard-based and command line applications for creating symbolic links over NFSv4 connections</li> <li>• NFSv4 compatible command line applications</li> </ul>
<b>Directory services support</b>	<ul style="list-style-type: none"> <li>• Support multiple directory service profiles for each directory service type</li> <li>• Support per-connection selection of directory service profile</li> <li>• Supports NIS, NIS+, LDAP, and Microsoft Active Directory®</li> <li>• Supports schema definitions including: RFC2307, RFC2307AIX, AD4UNIX, and Vintela VAS</li> </ul>	<ul style="list-style-type: none"> <li>• NFS server browsing</li> <li>• Auto-discovery of server configuration through DHCP</li> <li>• Auto-mount capability</li> <li>• Password synchronization</li> </ul>
<b>Security</b>	<ul style="list-style-type: none"> <li>• Supports RPCSEC-GSS (RFC2203) and GSS-API (RFC2078)</li> <li>• Supports Kerberos and LIPKEY as GSS providers</li> </ul>	<ul style="list-style-type: none"> <li>• Supports Solaris® ACL and SASL protocol for authenticating with Microsoft Active Directory domain (RFC2222)</li> </ul>
<b>Name mapping server</b>	<ul style="list-style-type: none"> <li>• A stand-alone server to map Windows user and group to UNIX® UID and GID</li> <li>• Intelligent Name Mapping Cache for improved productivity</li> </ul>	<ul style="list-style-type: none"> <li>• Supports Auto Mapping and Import/Export of mappings</li> <li>• Integrates with Directory Services</li> </ul>
